ONE 4 ALL MULTI PRIMER

From inspiration
to application

ONE 4 ALL

Multi-application primer for difficult surfaces

Suitable for painting on any surface such as MDF, hard PVC, polyester, glass, tiles, ceramics, fiberglass iron, aluminum, stainless steel, copper, zinc, wood such as chipboard and already painted with oil paint or electrostatic paint. It has excellent coverage, spreads wonderfully, ensuring uniform coverage of the final color. Repainted with any color water or solvent based of one component. It can be preserved as a final color while maintaining its properties giving an excellent semi-matte finish. The surface must be clean, not loose, dry and free of all materials that may impede adhesion.

Shade: White. Painted in pastel shades through tint system.

ONE 4 ALL

Adhesion promoter multi primer

New technology water primer with high adhesion to difficult surfaces

- Excellent adhesion to "difficult" surface
- Water-based
- Excellent stain insulation
- Low odor
- Quick dry
